Designed for use with current Ammco Bench Lathe models 3000*, 4000*, 4000E*, 4100* & 7500*. * When equipped with a 6900 or 6950 twin cutter. Not for use with the 7900 twin cutter or 3481/3491 extended arbors.

A safe clean work area;

Enclosing your lathe maximizes safety. Less dust in the air means easier breathing. Less shavings on the floor reduces slip risks. Easily monitor progress through the large viewing window. Put your lathe up front for walk in customers. Make your shop compliant with OSHA rules.

Low noise and easy disposal;

Air is changed twice a minute. Micro dust is trapped in the automotive filter. Heavy shavings are funneled into the bucket. Combined lathe and filter fan noise is 19db less than a typical shop vacuum.

Minimal space plus storage;

Top opens out of the work area. Does not extend behind the base. Lathe installs against a wall. 8" wider, 3" deeper than an Ammco 4100 in operation so only minimal room is required. Built in storage places adapters at the lathe.

Pressure Brake Bleeders

7300 & 7301 Include
Easy roll swivel casters.
Automatic fill nozzle with quick coupler
Fill funnel
Cup & Srying
1/4" and 3/16" ID Fluid collection hoses.

A properly equipped pressure brake bleeder makes brake bleeding a one man operation.

A large 4 gallon (15 liter) reservoir eliminates the need for frequent refilling.

A 12 foot (3.65m) hose with quick coupler and automatic shut off for convenience is included.

For added safety , brake fluid is always separated from pressurized air by a diaphragm.

Bleeders automatically shut off when fluid level is low and a safety relief valve prevents over-pressurization.

For bleeding high pressure anti-lock brake systems.

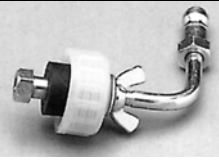

- Pressure gauge:: 0-60psi (maximum recommended bleeding pressure of 25psi. 48psi safety relief valve prevents over-pressurization.
